*"Cymarshall Law represents the best hip hop has to offer;
his energy and passion is refreshing in today's climate" - Talib Kweli*

"Cymarshall Law has his own flow and originality that hip hop lacks plus lyrics" - Wordsworth

Coming off his 2008 critically acclaimed, *Hip Hop in the Soul*, **Cymarshall Law** is prepared to take 2010 by storm. Just as the ink is drying on his deal with HiPNOTT Records, Cymarshall Law releases the **Creator's Kid EP**.

*"The project to me is an extension of my earlier works; me continuing to show what I can do as an artist. I called it the **Creator's Kid** because when I set out to write the record I knew the game was lacking creativity and with this I could do my part to fill the void. This is the stepping stone that will take me into the 2nd part of my career on a good note, because it shows I have the skill to compete and I finally completely set myself apart from the rest, showing my music has its own identity." – Cymarshall Law*

The production on the record is provided solely by Sweden native **D- Slaps**, with the exception of one track by **Remot**. The formula works, as the album presents us with just less than 30 minutes of raw nonstop hip hop. The first single, "**Harder than Thou**," is a fitting intro with its soulful boom-bap sound and cuts provided by **DJ JS-1**. Additional features on the album include **Skit Slam**, **Silent Knight**, and **Mary Lou**.
